Units of Measurement

Manage the quantities of underlying

Unreal Engine (UE) defaults to the following International System (SI) units for measurement:

Quantity	Unit
Distance/Length	Centimeters (cm)
Mass	Kilograms (kg)
Time	Minutes (min), Seconds (s)
Angles	Degrees (deg)
Speed/Velocity	Meters per Second (m / s)
Temperature	Celsius (C)
Force	Newtons (N)
Torque	Newton Meters (N * m)

For more information about all units available in UE, see the Available Units section below.

Change Default Units

You can change the units for any of these quantities in your project in the Unreal Editor. To change these units, follow these steps:

1. From the menu bar, select **Edit > Project Settings...**. This opens a new **Project Settings** window on left.
2. Navigate to **Editor > Appearance**.
3. Expand the category under **Units > Advanced**.
4. You should now see all the quantities of measurement along with their units. To change a quantity, select a new unit from the dropdown menu located next to the quantity you wish to change.
